PROFILE

React.js Developer with hands-on experience building responsive, component-based web applications using React, Next.js, Redux, and Tailwind CSS. Skilled in React Hooks (useState, useEffect, useMemo, useCallback), Context API, React Router, performance optimization via lazy loading, RESTful API integration using Axios and Fetch API, and full-stack development with Node.js, Express.js, and MongoDB. Experienced with server-side rendering (SSR) and static site generation (SSG) in Next.js, and version control (Git/GitHub). Completed a Web Developer internship delivering a live donor management system using Core Java and MySQL, following OOP and MVC principles.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
- React Ecosystem: React Hooks (useState, useEffect, useMemo, useCallback), Redux, Context API, React Router, Lazy Loading, Component-Based Architecture, Chart.js
- Backend: Node.js, Express.js, RESTful API Design & Integration, Axios, Fetch API, JWT Authentication, Core Java
- Database: MongoDB, MySQL
- Tools & Deployment: Git, GitHub (Version Control), VS Code, Postman, Vercel, Render
- Concepts & Practices: OOP, MVC Architecture, Web Performance Optimization, Debugging, Problem Solving, Team Collaboration

PROJECTS

TrackWise AI – AI-Powered Expense Management System — *Next.js, React.js, Node.js, Express.js, MongoDB, JWT, Redux/Context API, Tailwind CSS, Groq AI, Chart.js*

- Built a full-stack, AI-powered expense management application with JWT authentication, secure login/signup, and protected routes
- Developed a responsive, real-time dashboard displaying income, expenses, balance, and savings with full CRUD for transactions
- Integrated Groq AI to generate personalized financial insights and spending suggestions, plus interactive Chart.js analytics for category-wise expense breakdown
- Added budget management for monthly spending limits; deployed on Vercel (frontend) and Render (backend) with MongoDB Atlas
- Consumed backend APIs via Axios, and optimized rendering performance using useMemo, useCallback, and route-based lazy loading

[GitHub Repo](#) | [Live Demo](#)

Vendor Complaint Management System — *React.js, JavaScript, MongoDB, Cloudinary, Tailwind CSS*

- Developed a full-stack complaint management system enabling vendors to submit, track, and resolve complaints in real time
- Built RESTful APIs with MongoDB for data persistence and complaint status tracking
- Integrated Cloudinary for image upload and storage, allowing vendors to attach supporting images to complaints
- Designed responsive, reusable UI components with React and Tailwind CSS

[GitHub Repo](#) | [Live Demo](#)

Blood Donation Camp Management System (Personal Rebuild) — *Next.js, React.js, Express.js, MongoDB, Tailwind CSS*

- Built a full-stack donor management system streamlining donor registration, camp requests, and admin operations through a responsive interface
- Implemented backend with Express.js and MongoDB for data storage and RESTful API handling
- Deployed on Vercel with server-side rendering (SSR) for improved performance and SEO

INTERNSHIP

Web Developer Intern — AdlerNio Private Limited, Pune — *Nov 2025 – Dec 2025*

- Built a Blood Donation Camp Management System using Core Java and MySQL to manage donor registrations and camp details
- Designed a responsive frontend with HTML, CSS, and Bootstrap, implementing form handling and admin functionalities
- Collaborated on application development following OOP and MVC principles in a live production environment

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science — *Sadguru Gadge Maharaj College, Karad | Shivaji University | 2023 – 2026*

LANGUAGES

English, Marathi, Hindi
